# Urban biodiversity: importance and resistance

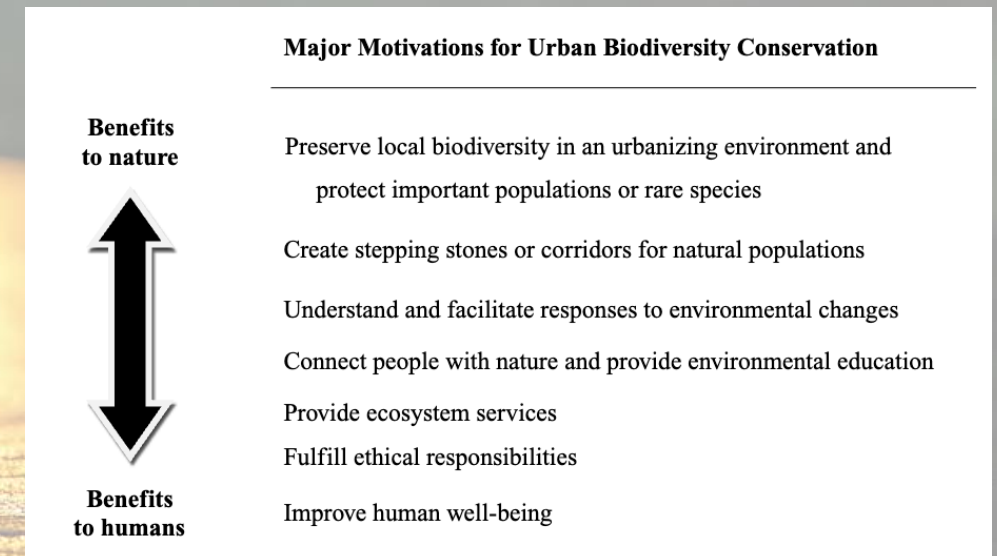

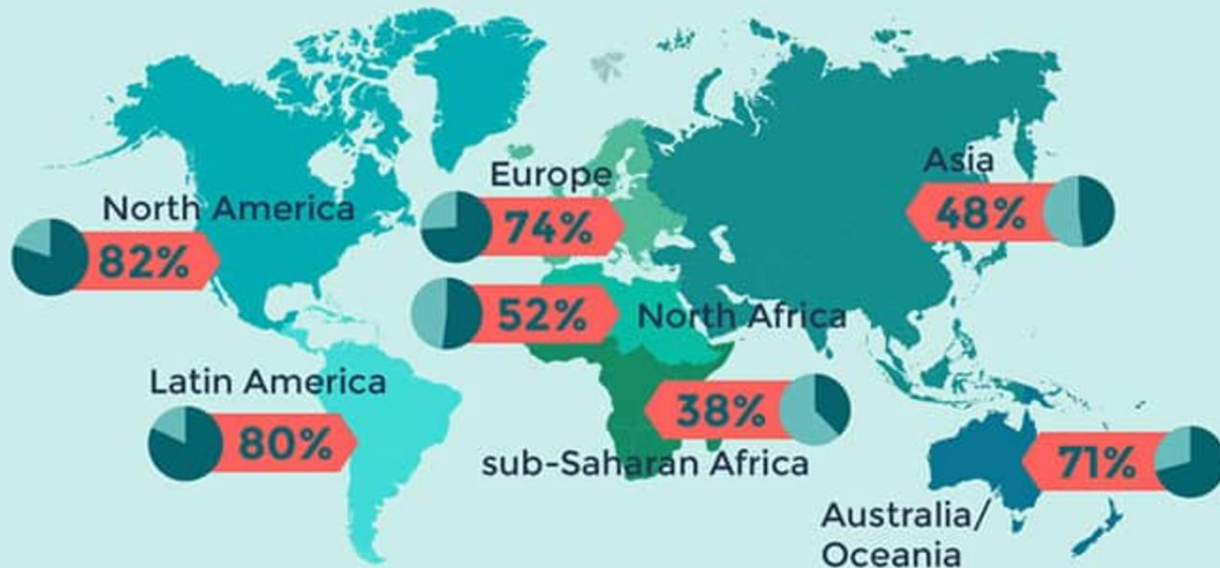

- **Urban biodiversity**: The sum of species and ecosystem diversity, genetic and habitat diversity in urban areas
- Global urban population: 4.5 billion (58%) , **increasing interaction** between urban biodiversity and humans.

# Urban biodiversity: importance and resistance

- **Urban biodiversity**: The sum of species and ecosystem diversity, genetic and habitat diversity in urban areas
- Global urban population: 4.5 billion (58%) , **increasing interaction** between urban biodiversity and humans.
- A vital role in development and human life, **key ecological services and functions**.

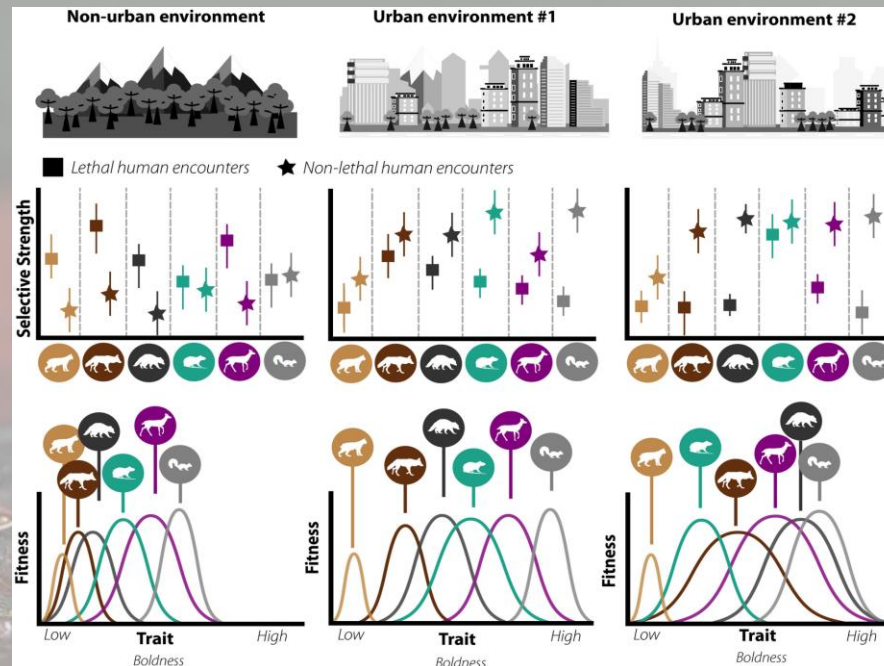

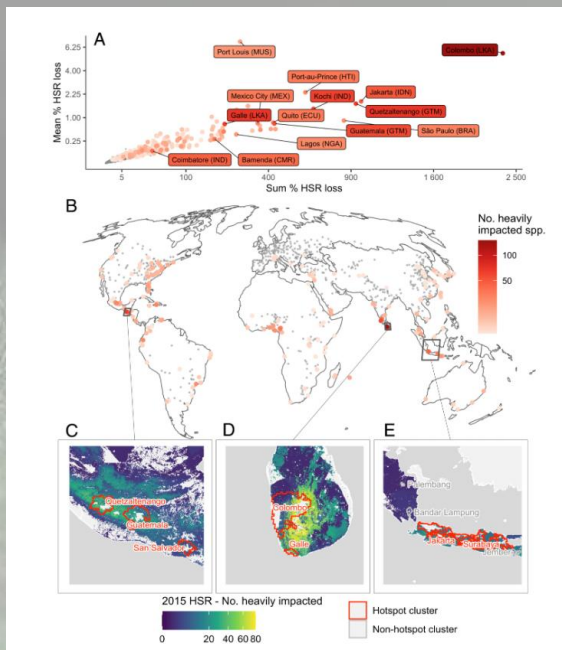

# Urban biodiversity: importance and resistance

## ● Coexistence of loss and resilience

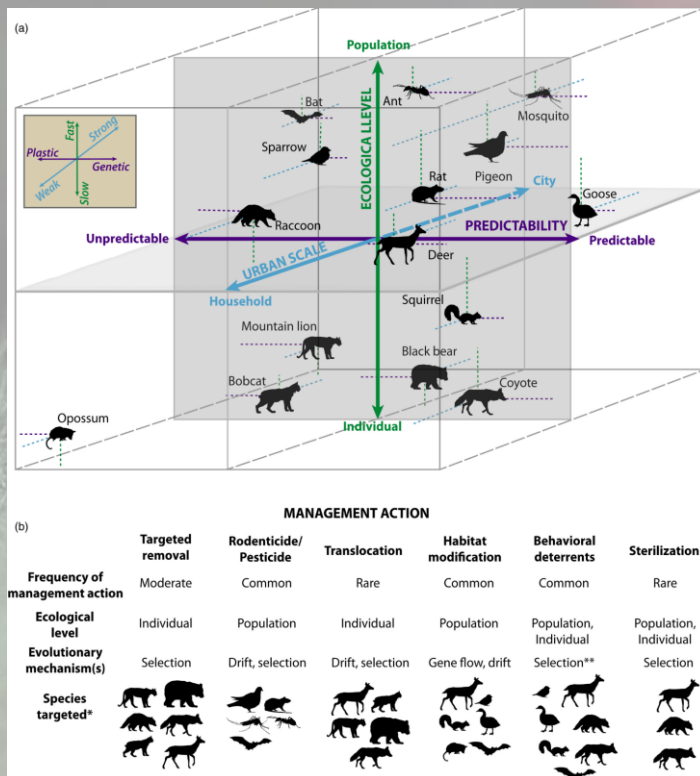

- Most research focus on **the decline in biodiversity caused by urbanization**
- Overlooks that **humans and wildlife coexisted in urban areas** since recorded history
- Urban species exhibit high behavioral plasticity, increasing in number and spreading distribution, **adapting to urban environments**.

Schell 2020; Simkin et al. 2022;

# Monitoring Gaps and Human-Wildlife Conflicts

- Changes in urban biodiversity and human-wildlife conflicts
  - **Rapid changes** in genetics, morphology, personality, behavior, population, distribution...

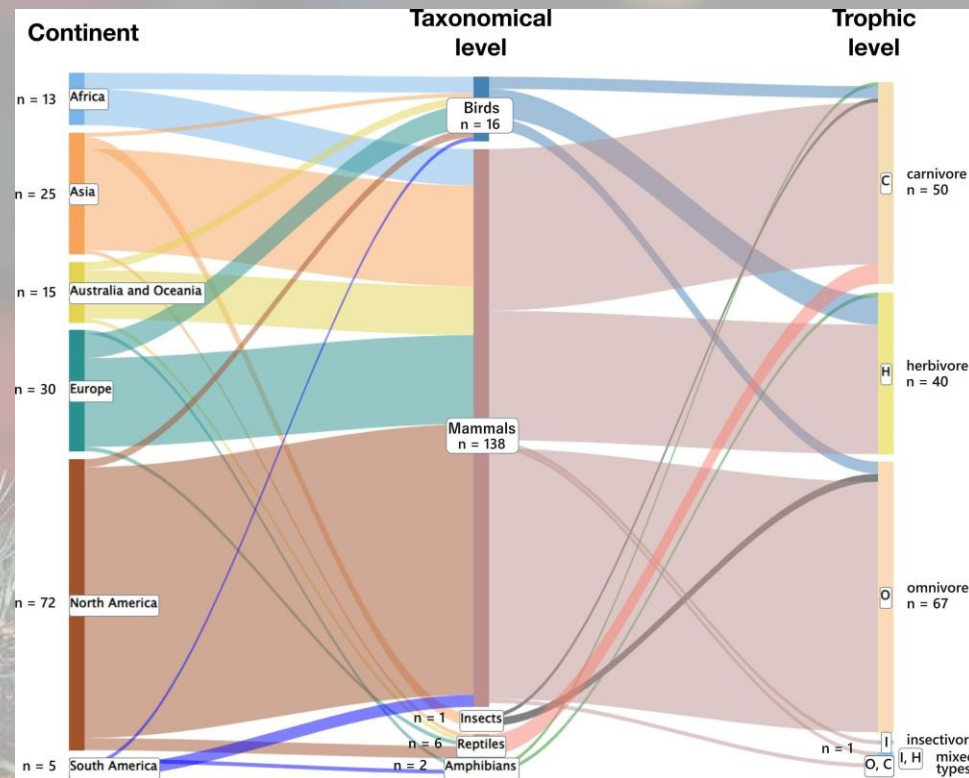

# Monitoring Gaps and Human-Wildlife Conflicts

- Changes in urban biodiversity and human-wildlife conflicts
  - **Rapid changes** in genetics, morphology, personality, behavior, population, distribution...
  - **All taxonomic groups are involved**, mammals the highest proportion

(b)

	MANAGEMENT ACTION					
	Targeted removal	Rodenticide/ Pesticide	Translocation	Habitat modification	Behavioral deterrents	Sterilization
Frequency of management action	Moderate	Common	Rare	Common	Common	Rare
Ecological level	Individual	Population	Individual	Population	Population, Individual	Population, Individual
Evolutionary mechanism(s)	Selection	Drift, selection	Drift, selection	Gene flow, drift	Selection**	Selection
Species targeted*						

Basak et al. 2023; Schell et al. 2020

# Monitoring Gaps and Human-Wildlife Conflicts

- Human-Wildlife Conflicts in cities
  - Direct conflicts: attacks, harassment, traffic accidents, etc.
  - Indirect conflicts: parasites, zoonotic diseases, noise, environmental pollution, etc.
  - **Monitoring gaps, conservation challenge, and human-wildlife conflicts are universally present globally.**

Coyote in Los Angeles

Red fox in London

Wild boar in Nanjing, Hangzhou, Shenzhen

The image features two raccoon dogs in silhouette, positioned against a bright, circular light source that creates a strong backlighting effect. The animals are shown in profile, facing right. The light source is a large, glowing orb, possibly the sun or moon, which casts a warm, golden light across the scene. The background is a deep, dark green, providing a stark contrast to the bright light and the dark silhouettes of the animals. The overall mood is serene and dramatic.

# Raccoon dogs

*(Nyctereutes procyonoides)*

# Raccoon dogs *(Nyctereutes procyonoides)*

- Nocturnal activity pattern
- Solitary species
- Live in mountainous areas
- Omnivore foraging strategy

# Raccoon dogs (*Nyctereutes procyonoides*)

- Historical distribution **throughout eastern China**
- **Population disappeared** in most urban/ suburban areas

2020:  
70+ individuals in one community

2020:  
Found in 30 residential districts

2021: 170 residential districts  
2024: 300+ residential districts

# Surge in Human-Raccoon Dog Conflicts in Shanghai

## ● Surge in Conflicts

- Over 300 residential areas
- Distributed in all districts and counties
- Conflicts/ complaints: 0 to 300+
- 3 Direct attack
- Tens of illegal poaching

# Research and conservation goals

- **Species perspective**

- Is the species **adapted to human environment?**
- What is the population **trend in near future?**

- **Human perspective**

- How to alleviate human-raccoon dog conflict?
- What method can be used to promote coexistence?

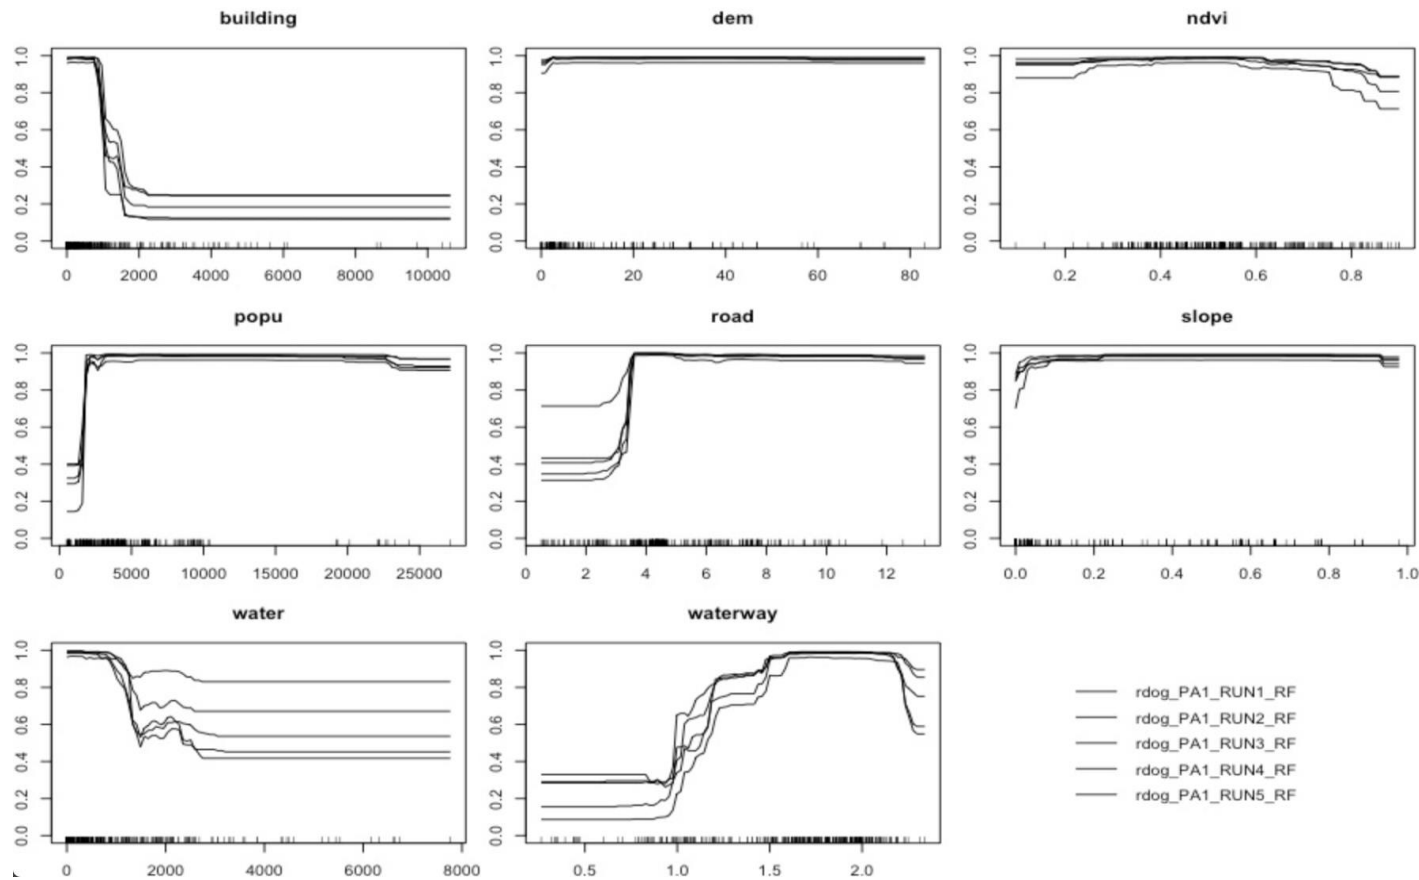

# Habitat modeling: Revealing species' positive association with human

- Field techniques
  - Camera trapping
  - Sign transect
  - GPS tracking
- Ensembling modeling approach
  - Occupancy modeling
  - Random forest

# Species positively associated to human factors

- Positive association:
  - Road density, night light, human density
- Negative association:
  - Large lake, farmlands

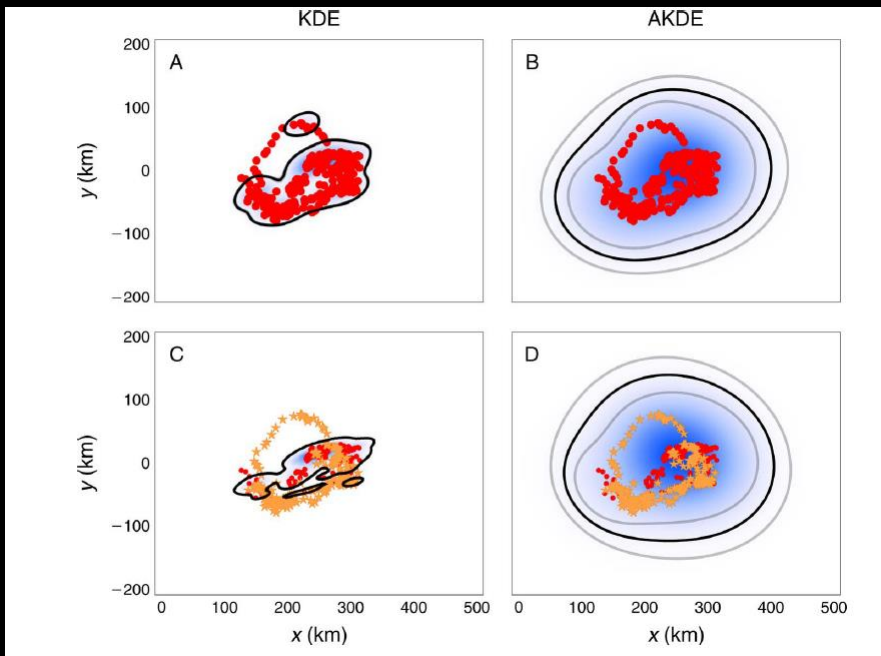

*Landscape and Urban Planning (2021)*

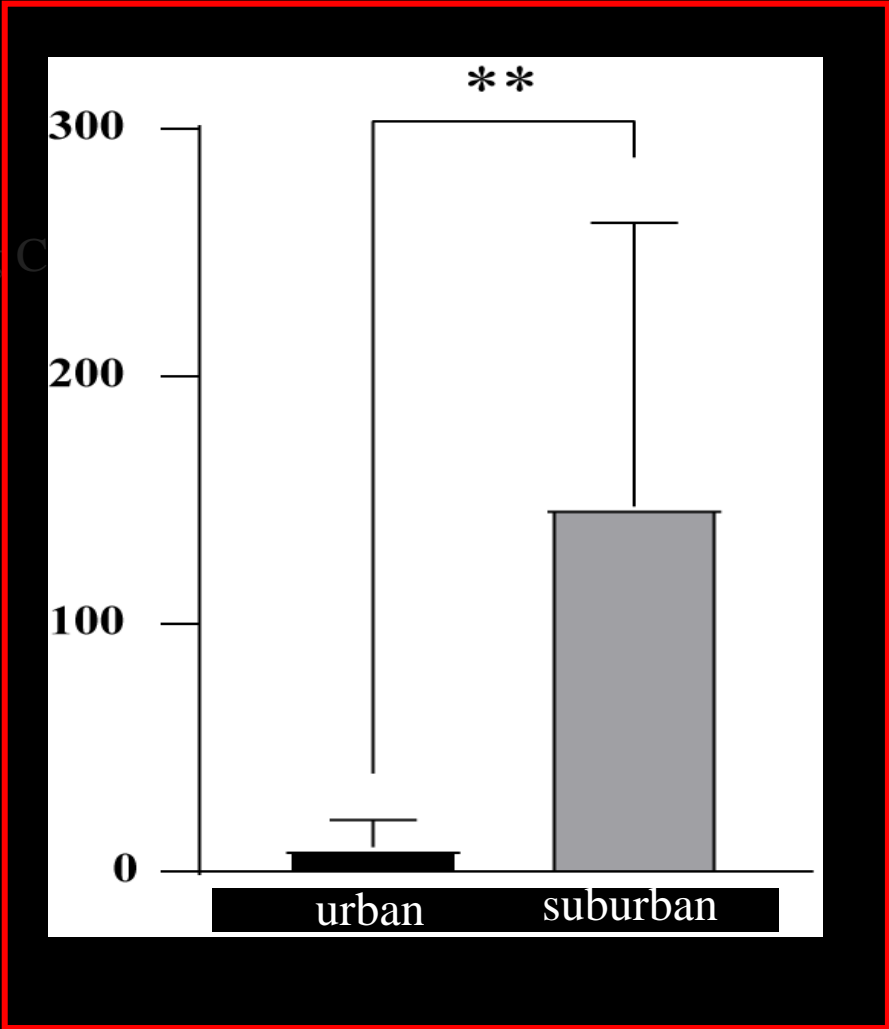

# Home range analysis: indication behavioral plasticity

## 10% home range size

urban individuals compared to suburban ones

Environment	Mean	Standard deviation	P value
urban	10.4	10.1	0.000**
suburban	165.95	128.18	

*Environmental Research Letters (2021)*

# Thorough behavior change

**Higher boldness** level in 0.1km<sup>2</sup>

Demonstrated **higher daytime activity**

Solitary animal demonstrated **social behavior** ( e.g. allomaternal care)

# Diet analysis:

Overabundant:

wet-waste and cat food feeding

Loss of natural foraging behavior

Site	Anthropogenic items	Bird	Mammal	Plant	Invertebrate
F-U1	0.630	0.065	0.370	1.000	0.478
F-U2	0.636	0.182	0.273	0.818	0.455
F-U3	0.833	0.000	0.444	1.000	0.333
F-S1	0.455	0.045	0.318	0.955	0.409
F-S2	0.588	0.118	0.176	1.000	0.529

Cross tabs with Chi-square of environment x anthropogenic items

Environment		anthropogenic items		Total
		F	T	
suburban	O	20	19	39
	E	15.1	23.9	39.0
urban	O	24	51	75
	E	28.9	46.1	75.0
Total		44	70	114

$\chi^2 = 4.025$ ,  $P = 0.045$

上海市人大常委会办公厅公告

市十六届人大常委会第二次会议对《上海市野生动物保护条例（草案）》进行了审议。为进一步发扬立法民主, 现将条例草案及相关说明在解放日报、上海法治报、东方网(www.eastday.com)、新浪网(www.xinmin.cn)、上海人大网、“上海人大”微信公众号上全文公布, 向社会广泛征求意见, 以便进一步研究修改, 再提请以后的常委会会议审议。现将有关事项告知如下:

一、公开征求意见的时间

2023年4月27日至5月11日

《野生动物保护条例》 2023年10月1日生效

Major suggestions be incorporated in **Shanghai Wildlife Protection Law**

“public participation”, “community-based management”, “educational efforts”

## The monitoring and management of urban biodiversity: using citizen science to connect Shanghai residents, researchers and authorities

- Citizen Science Recruitment: **1,000+ citizen volunteers**
- Research Outputs: **7 SCI publications**, 3 dissertations
- Popular Science: **2 documentaries**, 2 illustrated books
- Policy Outputs: **1 municipal conservation regulations**
